

## Peertechz's editorial work flow-chart

What is Editorial work flow-chart?

Peertechz is a synonym for the publication of trustworthy, novel and quality-generating manuscripts. To continue this journey hassle-free, we incorporate editorial workflow through Peertechz Online Manuscript Tracking System (POMT). Whenever a manuscript is submitted for publication, it undergoes review and revision process by Peertechz's editorial office to check whether the manuscript can go for publication without alteration or it requires some mandatory changes for suitability to publication process. Peertechz ensures that submitted manuscripts are handled by the editors without any potential conflict of interest.

Understanding the workflow with the help of flowchart:
