## [The association between cervical lordosis and age, sex, history of cervical trauma and sedentarity: A CT study](#)

Published On: April 28, 2020 | Pages: 009 - 015

Author(s): David Ezra, Leonid Kalichman, Azaria Simonovich, Jonathan Droujin, Ella Been And Deborah Alperovitch-Najenson\*

Purpose: We evaluated the association between cervical lordosis and age, sex, sedentarity, and history of cervical trauma. Methods: CT scans of 206 individuals, 111 with and 95 without a history of cervical trauma were divided into three age groups (18-39, 40-59 and 60+ years). The cervical lordosis measurements [C0-C7 (total), C0-C3 (upper), C2-C7 (mid-lower), and ...

## [Interaction of psoriasis and pregnancy: Maternal and fetal outcomes](#)

Published On: March 13, 2020 | Pages: 001 - 008

Author(s): Sevgi Akarsu\*

Psoriasis is a chronic immune-mediated inflammatory disease that affects about 2%-4% of the population. Clinically typical erythematous-squamous papules and plaques of different sizes and shapes on the skin are characterized by the parallel appearance of epidermal hyperproliferation, inflammation and angiogenesis. Although many factors are blamed in the etiology of p ...
