Effect of affordability of alcohol on the level of alcohol consumption in Russia

Published On: December 30, 2020 | Pages: 082 - 085

Author(s): Razvodovsky YE*

Objective: To study the relationship between the affordability of alcohol and the level of its sale, the total level of consumption, as well as the consumption of unrecorded alcohol in Russia in the post-Soviet period. Methods: A comparative analysis of the dynamics of the affordability of alcohol, the level of its sale, the total level of consumption, as well as th ...

Use of secondary data analyses in research: Pros and Cons

Published On: July 08, 2020 | Pages: 058 - 060

Author(s): LL Pederson*, E Vingilis, CM Wickens, J Koval and RE Mann

What are secondary data? Secondary data refer to data that are collected by someone other than the user or are used for an additional purpose than the original one. A wide range of sources can be used as secondary data: censuses, information collected by government departments, organizational records and data that were originally collected for other research purpose ...

Project Save Lives: Rapid treatment protocol using peer recovery specialists in the emergency department
Background: Overdose deaths involving opioids, heroin, and fentanyl-class drugs have dramatically increased in the United States in the last decade. In response to the epidemic, the City of Jacksonville (Florida) and local providers came together and developed a plan to reduce repeat overdoses and deaths called Project Save Lives (PSL). PSL utilized Certified Recovery ...
Marijuana and alcohol increase crash avoidance reaction time in a driving simulator test at blood concentrations below commonly-used per se ‘Cut-offs’ for Intoxication

Published On: March 27, 2020 | Pages: 009 - 015

Author(s): Kawthar Alali, Jessica Stewart, Rimzim Taneja, Edison Nwobi, Brianna Murdock, Tyiesha Head, Ki-Jana Malone, Mohammed B Mohammed, MaryAnne Stewart, Jamie McQueen, Doreen Head and Randall Commissaris*

The present study demonstrates marijuana- and alcohol-induced impairment of a driving-relevant measure in a driving simulator task at (estimated) blood alcohol and THC concentrations that are below the per se cut-off for impaired driving in several states. The subject was an adult male with a history of occasional alcohol use (2-3 times/week for the past 6 months) and ...

Overview of withdrawal syndrome mechanisms in different substance abuse addictions: Neuronal circuits and transmitters
Substance abuse is one of the major concerns of human societies. Many problems exist for controlling drug abuse that profoundly influences treatment. One of the most important and prevalent problems is Withdrawal Syndrome (WS). The WS describes a host of unpleasant symptoms that develop in the withdrawal period. WS should be suppressed in the withdrawal period because ...

**Pathological gambling in motion pictures; A systematic review**

Background: The aim of this study is to analyze the movies of pathologic gambling from comprehensive samples.

Methods: Movies (all 102 titles) related to gambling were collected by keyword search in IMDB (International Movie Database, www.imdb.com). Among them, 16 titles were selected in which the storyline was directly related to gambling, gambling scene was exposed ...

**Sensor of molecular imbalance in metabolic disorder: Determination of molecular behavior wired in disease utilizing metabolomics**

Metabolic disorders are known as one of the largest obesity epidemics and associated with health-related problems such as cardiovascular disease, diabetes, hypertension and hyperlipidemias in the US. Obesity related to an imbalance of metabolism from environmental stressors impacting metabolic rate, reflects the multi-dimensional molecular network. Obesity is also ass ...
Evaluation of pharmacological and non–pharmacological methods of smoking cessation; A Review

Published On: June 06, 2020 | Pages: 045 - 051

Author(s): Nandita Gautam, Shivalingesh KK*, Swati Sharma, Resham Irshad and Satyaki Verma

Objective: To review the pharmacologic and non-pharmacological therapies of smoking cessation. During recent years, there have been many advances in different types of pharmacological and nonpharmacological tobacco cessation treatments. This paper reviews the established pharmacological methods such as nicotine replacement therapy (NRT) (patches, gum, sublingual t ...

Wake Up America and Save Lives!!! Move the Drunk Driving Blood Alcohol Concentration (BAC) Cut-off to 0.05%!!!

Published On: November 26, 2020 | Pages: 077 - 081

Author(s): Tylor Zohr, Edison Nwobi, Tariq Masri-zada, Jessica Andrews, Tyiesha Head, Dima Awad, Medina Sareini, Doreen Head and Randall Commissaris*

This paper argues for an established Blood Alcohol Concentration (BAC) cut-off for impaired driving at 0.05%, aka 0.05 g/dl, for drivers in the United States. This argument is backed by scientific evidence collected over many years and multiple countries using crash data and fatality data; we shall provide an example from our own research as well. We will demonstrate ...

**Addiction**

Published On: February 06, 2020 | Pages: 001 - 002

Author(s): Joseph Agassi*

Addiction is usually linked to psychoactive drugs. This is only approximately true, since one can be addicted to common objects such as starch and to abstract items such as some habits, such as attachments to certain objects, often known as fetishism. Moreover, the common use of such drugs, especially alcohol and opium, are seldom addictive. Hence, addiction is a stat ...
