[Musculoskeletal system for healing of a bone fracture](#)

Published On: December 28, 2019 | Pages: 001 - 001

Author(s): Padmavathi I*

Fractures can be complete or partial. Some fractures needs surgery or metal plates, while some fractures may only need a brace. Types of fractures are transverse, oblique, spiral, and comminute, impacted, greenstick, open and closed. The healing of fractures begins with the formation of a hematoma by internal and external calli. ...
