Delayed percutaneous endoscopic gastrostomy tube removal in patients with oropharyngeal carcinoma

Published On: October 20, 2020 | Pages: 098 - 105

Author(s): John T Lucas, Rita Poon, Scott Finlay, Ryan Anderson, Mac Robinson, Ralph D'Agostino, Kathryn M Greven and Mercedes Porosnicu*

Objective: Early nutritional intervention through enteral feeding can reduce treatment alterations and complications in patients with Oropharyngeal Cancer (OPC) undergoing Chemoradiation Treatment (CRT). There is no conclusive evidence supporting prophylactic (pPEG) versus reactive PEG. Prolonged PEG dependence is a concerning adverse effect of pPEG. Recognition of ri ...

Treatment of sinusitis associate with filling material of the maxillary sinus by endonasal endoscopic sinus surgery simultaneous sinus-lifting and dental implantation

Published On: November 23, 2020 | Pages: 114 - 117

Author(s): Gagik Hakobyan*, Grigor Khachatryan, Levon Khachatryan, Lazar Yessayan and Davit Mathevosyan

Objectives: Optimization of the sinus-lifting in patients with filling material in maxillary sinus cavity by a one-stage endonasal endoscopic elimination of the sinus pathology and carrying out a sinus-lifting. Materials and methods: A total of 14 patients (8 males and 6 females, the age was 31 to 64 years, from 2016 to 2020) with ridge defects in age group were sele ...
Recent Hearing Loss and Earache due to Bilateral Otitis Media associated with SARS-CoV-2 infection

Published On: November 20, 2020 | Pages: 111 - 113

Author(s): Sahrish Ilyas and Samba Siva R Bathula*

Background: Since the outbreak began in late December 2019, COVID-19 has been declared a global pandemic, with over 3 million cases reported worldwide. COVID-19 is known to present commonly with symptoms such as fever, cough, shortness of breath, myalgias, loss of sense of taste and smell. Otalgia and hearing loss have been reported very rarely. We present a case of u ...

The Role of Speech Therapists in Olfactory Rehabilitation: A Short Report on Ten Cases of Total Laryngectomy

Published On: December 09, 2020 | Pages: 118 - 121

Author(s): Michelle Passerini, Martina Da Re, Sonia Antoni, Cristina Pierluca, Giancarlo Tirelli and Vittorio Grill*

Introduction: Total Laryngectomy (TL) has to be performed in advanced hypopharyngeal or laryngeal cancer, with the consequence of both the loss of the vocal functions and the impairment or loss of smell and taste. Since less attention is turned towards the recovery of the olfactory function compared to the vocal rehabilitation, the Nasal Airflow-Induced Maneuver (NAIM ...

Determining the tracheal tube size by echography

Published On: October 29, 2020 | Pages: 109 - 110

Author(s): Hector R Diaz Aguila*

In this paper we described the importance and how is performed the echography for measuring the diameter of trachea
Prevention of CSF leakage after endoscopic endonasal approach and effects of collaborative work

Published On: October 24, 2020 | Pages: 106 - 108

Author(s): Ahmet Ozak* and Cem Celal Aslan

Endoscopic Endonasal Approach (EEA) has been used frequently in recent years, especially for the sellar pathologies. Although there is an increase in extent of tumor resection rates, the rates of CSF leakage appear to be high in patients undergoing EEA surgery. The use of pediculed nasoseptal flaps is gradually increasing for the prevention of rinorrhea. In pathologi ...
