**[Islanded supraclavicular artery flap: A versatile flap for oral reconstruction](#)**

Published On: May 03, 2021 | Pages: 012 - 015

Author(s): Farooq A Bhat, Bashir Ahmad Bhat\* and Zahoor Ahmad Naikoo

Background: Supraclavicular flap is an excellent fasciocutaneous flap for head and neck reconstruction due to its close color and texture match. The aim of this study is to present supraclavicular artery island flap as an alternative choice in patients who need a free flap like radial forearm or ALT flap for reconstruction of oral mucosal defects, but are not fit for ...

**[Dilated jugular venous arch mimicking a medial neck mass – A case report](#)**

Published On: June 11, 2021 | Pages: 016 - 018

Author(s): Tran Van Buu\*, Grégoire Braux, Benoît Pacquelet, Emmanuel Babin and Justin Dugué

The Anterior Jugular Venous System (AJVS) comprises a pair of anterior jugular veins and jugular venous arch, which plays an important role in the interconnection between superficial and deep veins. Anatomical variation of the AJVS predisposes one to dangerous complications during procedures involving head and neck region. Furthermore, these aberrant anatomies ...
