## [Addressing the treatment of macrophage activation syndrome: A challenging balance between immune suppression and infectious risk](#)

Published On: August 13, 2022 | Pages: 011 - 014

Author(s): Vassia V, Iannaccone A, Marengo S, Briozzo A, Brussino A, Alessi L, Brussino L and Norbiato C\*

Hemophagocytic Lymphohistiocytosis (HLH) is a rare and potentially life-threatening syndrome related to a dysregulation of cytolytic function of Natural Killer (NK) cells and cytotoxic T cells (CTLs), which in turns leads to an inappropriate immune stimulation and hyperinflammatory state, resulting in hypercytokinemia, accumulation of activated lymphocytes and macroph ...

## [Detoxification: We need necessary endogenous pathways](#)

Published On: July 13, 2022 | Pages: 008 - 010

Author(s): Manfred Doepp\*

Toxins are substances that burden the body and can lead to disease. They either originate from the body's metabolism or were supplied from outside. The organism is forced to transport these substances out if it wants to maintain its integrity.

There are many ways to do this that we are rarely aware of. These will be pointed out. It is of great importance that we do no ...
