Actinic cystitis hematuria is a frequent complication after pelvic radiotherapy, present in approximately 5% of patients exposed to this therapy. The management of these cases seems to be a challenge for today's urologists. In this article, we present the case of a 73- year-old man diagnosed with actinic cystitis after pelvic radiotherapy and admitted to our service w ...

**[Pneumomediastinum following dental extraction – a case report in a tertiary hospital](#)**

Published On: May 07, 2022 | Pages: 026 - 028

Author(s): Christian Haddad\*, Mohamad Awali, Salim Ismail, Getachew Gudero and Jacques Choucair

Pneumomediastinum is a rare complication described following dental extraction, especially of the third molar. 212 case reports were described in the English literature since 1960. We describe a case report of a 19-year-old girl who presented to the emergency department with subcutaneous emphysema. Investigations showed the presence of pneumomediastinum. The patient w ...

## [\*\*Glimepiride induced Syndrome of Inappropriate Antidiuretic Hormone Secretion \(SIADH\): A case report\*\*](#)

Published On: April 30, 2022 | Pages: 023 - 025

Author(s): Afia Zainab Tanni\*, Md Farid Uddin, Shohael Mahmud Arafat, Shahjada Selim, Marufa Mustari and MSI Tipu Chowdhury

The Syndrome of Inappropriate Antidiuretic Hormone Secretion (SIADH) is an important cause of hyponatremia in hospitalized patients and can be caused by a variety of drugs. SIADH is a recognized side effect of 1st generation sulfonylurea (Chlorpropamide) due to its effect on vasopressin secretion. Here we described a 55-year-old woman with uncontrolled type 2 diabetes ...
