[Ambiguities of care in Alzheimer's disease: To care/become a caregiver by obligation or by the charity](#)

Published On: December 17, 2022 | Pages: 079 - 085

Author(s): Luana Machado Andrade*, Luma Costa Pereira Peixoto, Lucio Silva Sena, Patrícia Anjos Lima de Carvalho, Luciana Araújo dos Reis and Edite Lago da Silva Sena

Objective: To understand the meaning of the ambiguities of being a caregiver experienced by family caregivers of people with Alzheimer's disease and health workers inserted in community Mutual Help Groups. Method: a study based on the ontology of Maurice Merleau-Ponty's experience based on the notion of the body itself. It is revealed by the participation of 12 women ...

[Cephalometric evaluation and comparison of upper pharyngeal airway space in cleft lip and cleft palate patients treated with maxillary advancement and camouflage](#)

Published On: December 09, 2022 | Pages: 071 - 078

Author(s): Kairav Pragnesh Joshi, Shashikumar B, Anand K Patil, Roopak D Naik and Ashwini K*

Introduction: Pharyngeal airway space has become an important criterion for diagnosis and treatment planning and this has led to a paradigm shift towards soft tissue evaluation for orthodontic diagnosis and treatment planning, The aims and objectives of the study were to evaluate and compare upper pharyngeal airway space in Cleft Lip & Cleft Palate patients who underw ...

[Investigating the impact of selfcare stress reduction strategies on cortisol levels](#)

Published On: October 12, 2022 | Pages: 057 - 062

Author(s): Ishika M Binu*

It has been shown that behavioral therapy has effects on stress and also cortisol levels. This study investigated the impact of self-care stress reduction strategies on the cortisol levels of 59 urine samples. Stress behavior was evaluated by using written responses (questionnaire). Results indicated that transcendental meditation was statistically associated with the ...

[An uncommon “third window” in retrofenestral otosclerosis](#)

Published On: November 09, 2022 | Pages: 063 - 067

Author(s): Zambonini Giulia*, Ghiselli Sara, Di Trapani Giuseppe, Maroldi Roberto and Cuda Domenico

Otosclerosis is an otologic disease characterized by disordered resorption and deposition of the otic capsule bone. It can lead to progressive conductive, mixed or sensorineural Hearing Loss (HL). In rare cases, it manifests itself with a tendency for massive bone resorption with subsequent formation of cavities (“cavitating otosclerosis”). Cavities can sometimes real ...
