Review Article

**Chromatin Remodeling Complexes: The Regulators of Genome Function**

Published On: December 30, 2016 | Pages: 007 - 013

Author(s): Shashibhal M Pandey*

Genome in eukaryotes is large enough to be accommodated in tiny nucleus. It is required to achieve high degree of compaction for getting into the nucleus. Compaction is achieved by folding the DNA in the form of chromatin. ...
