Published On: March 03, 2021 | Pages: 013 - 023

Author(s): Wazir Shafi*

The study was carried out, in Illubaboral zone of Oromia regional at western part of Ethiopia in Bedelle municipal abattoir from November 2010 to the end of March 2011, in order to determine the prevalence of liver fluke, the species of liver fluke and to compare the diagnostic efficiency of fecal and post mortem examination. Out of 384 livers and fecal samples examin ...
Why advocacy for the one health approach attract attention than its practical implementation

Published On: January 18, 2021 | Pages: 001 - 004

Author(s): Behailu Assefa*, Samson Terefe and Balako Gumi

One Health is a holistic approach for investigation as well as for the control of human, animal, and environmental health problems. It comes with a multisectoral approach for the multifactor health problems and this made it to be more advocated. One Health is advocated in different regards like progressing a One Health approach to encourage health at the human-animal-...
