[Effect of affordability of alcohol on the level of alcohol consumption in Russia](#)

Published On: December 30, 2020 | Pages: 082 - 085

Author(s): Razvodovsky YE*

Objective: To study the relationship between the affordability of alcohol and the level of its sale, the total level of consumption, as well as the consumption of unrecorded alcohol in Russia in the post-Soviet period. Methods: A comparative analysis of the dynamics of the affordability of alcohol, the level of its sale, the total level of consumption, as well as th ...

[Use of secondary data analyses in research: Pros and Cons](#)

Published On: July 08, 2020 | Pages: 058 - 060

Author(s): LL Pederson*, E Vingilis, CM Wickens, J Koval and RE Mann

What are secondary data? Secondary data refer to data that are collected by someone other than the user or are used for an additional purpose than the original one. A wide range of sources can be used as secondary data: censuses, information collected by government departments, organizational records and data that were originally collected for other research purpose ...

[Project Save Lives: Rapid treatment protocol using peer recovery specialists in the emergency department](#)

Published On: June 11, 2020 | Pages: 052 - 057

Author(s): Lori A Bilello*, Katryne Lukens Bull, Shiva Gautam and Raymond Pomm

Background: Overdose deaths involving opioids, heroin, and fentanyl-class drugs have dramatically increased in the United States in the last decade. In response to the epidemic, the City of Jacksonville (Florida) and local providers came together and developed a plan to reduce repeat overdoses and deaths called Project Save Lives (PSL). PSL utilized Certified Recovery ...

[**Smokeless tobacco: Knowledge, attitudes and use among adults in Lagos, South-West, Nigeria**](#)

Published On: May 26, 2020 | Pages: 035 - 040

Author(s): Opanuga OA Ayankogbe OO, Oluwole EO and Odukoya OO*

Background: Smokeless tobacco (SLT) use leads to nicotine addiction and is associated with several health problems. However, it may be perceived as a safe alternative to cigarettes resulting in a potential for increased use among smokers and non-smokers alike. We assessed the pattern of smokeless tobacco use, as well as, the knowledge and attitudes towards SLT among a ...

[**What proportion of ever smokers quit? Analysis of information from CAMH from 1996-2016**](#)

Published On: May 09, 2020 | Pages: 021 - 025

Author(s): LL Pederson*, J Koval, AR Ialomiteanu, M Chaiton and RE Mann

Objectives: The purpose of this research is to examine trends in the rates of reported quitting (for more than twelve months) among regular and occasional smokers in the Province of Ontario for over twenty years. In addition to the overall trends, we examine trends for males and females, and for different age groups. Methods: A range of legislative measures have bee ...

[Marijuana and alcohol increase crash avoidance reaction time in a driving simulator test at blood concentrations below commonly-used per se 'Cut-offs' for Intoxication](#)

Published On: March 27, 2020 | Pages: 009 - 015

Author(s): Kawthar Alali, Jessica Stewart, Rimzim Taneja, Edison Nwobi, Brianna Murdock, Tyiesha Head, Ki-Jana Malone, Mohammed B Mohammed, MaryAnne Stewart, Jamie McQueen, Doreen Head and Randall Commissaris*

The present study demonstrates marijuana- and alcohol-induced impairment of a driving-relevant measure in a driving simulator task at (estimated) blood alcohol and THC concentrations that are below the per se cut-off for impaired driving in several states. The subject was an adult male with a history of occasional alcohol use (2-3 times/week for the past 6 months) and ...

[Trihexyphenidyl abuse in psychiatric outpatient clinic of a general hospital in Northern Nigeria](#)

Published On: March 26, 2020 | Pages: 003 - 008

Author(s): Raji Saheed Olanrewaju* and Abba Mannir

Background: Concomitant prescription of anticholinergics with first generation antipsychotic medications is widely practiced in psychiatry to avert or abort extrapyramidal side effect resulting from the latter. Trihexyphenidyl (Benzhexol) is the most commonly prescribed and the most likely to be abused amidst the anticholinergics in Nigeria. Objectives: To explore ...

[Overview of withdrawal syndrome mechanisms in different substance abuse addictions: Neuronal circuits and transmitters](#)

Published On: November 17, 2020 | Pages: 070 - 076

Author(s): Hamidreza Famitafreshi and Morteza Karimian*

Substance abuse is one of the major concerns of human societies. Many problems exist for controlling drug abuse that profoundly influences treatment. One of the most important and prevalent problems is Withdrawal Syndrome (WS). The WS describes a host of unpleasant symptoms that develop in the withdrawal period. WS should be suppressed in the withdrawal period because ...

[Sensor of molecular imbalance in metabolic disorder: Determination of molecular behavior wired in disease utilizing metabolomics](#)

Published On: July 20, 2020 | Pages: 061 - 063

Author(s): Michael Chernichaw, Yoon Ju Lee, Diane E Heck and Hong Duck Kim*

Metabolic disorders are known as one of the largest obesity epidemics and associated with health-related problems such as cardiovascular disease, diabetes, hypertension and hyperlipidemias in the US. Obesity related to an imbalance of metabolism from environmental stressors impacting metabolic rate, reflects the multi-dimensional molecular network. Obesity is also ass ...

[Wake Up America and Save Lives!!! Move the Drunk Driving Blood Alcohol Concentration \(BAC\) Cut-off to 0.05%!!!](#)

Published On: November 26, 2020 | Pages: 077 - 081

Author(s): Tylor Zohr, Edison Nwobi, Tariq Masri-zada, Jessica Andrews, Tyiesha Head, Dima Awad, Medina Sareini, Doreen Head and Randall Commissaris*

This paper argues for an established Blood Alcohol Concentration (BAC) cut-off for impaired driving at 0.05%, aka 0.05 g/dl, for drivers in the United States. This argument is backed by scientific evidence collected over many years and multiple countries using crash data and fatality data; we shall provide an example from our own research as well. We will demonstrate ...

[Use of a combination of ketamine and dexmedetomidine \(Ketodex\) in different clinical cases](#)

Published On: June 06, 2020 | Pages: 041 - 044

Author(s): Somchai Amornyotin*

Ketodex is a combination of ketamine and dexmedetomidine. Ketamine, an old intravenous anesthetic, is a non-narcotic and non-barbiturate drug. It has several properties of the ideal anesthetic agent. However, ketamine can produce the psychological adverse effects. Dexmedetomidine has analgesic, amnesic, sedative and anxiolytic properties. A distinct advantage of dexme ...

[Addiction](#)

Published On: February 06, 2020 | Pages: 001 - 002

Author(s): Joseph Agassi*

Addiction is usually linked to psychoactive drugs. This is only approximately true, since one can be addicted to common objects such as starch and to abstract items such as some habits, such as attachments to certain objects, often known as fetishism. Moreover, the common use of such drugs, especially alcohol and opium, are seldom addictive. Hence, addiction is a stat ...
