[Quantification of Organophosphate and Carbamate residue on stored grains in Ondo State, Nigeria](#)

Published On: July 28, 2018 | Pages: 001 - 006

Author(s): Akinneye Joseph O*, Adedolapo AO and Adesina Femi P

Pesticides are beneficial in reducing the loss cause by insect infestation on grains but its toxicity and persistence in the environment is of health concern. Cereal grains preserved with insecticide are considered to be good for consumption if it's active content substances of insecticide do not exceed the maximum residue limits (MRLs). ...
