## [Extreme Stent Malapposition after Percutaneous Coronary Intervention in Bifurcation Lesions: An Optical Coherence Tomography](#)

Published On: December 10, 2020 | Pages: 302 - 307

Author(s): Hesham Refaat\*

Background: Anecdotal cases of bifurcation lesion stenting indicated that a wrong kissing Balloon Inflation (KBI) technique can lead to extreme stent malapposition with even stent crushing. The aim of this study was to quantify the occurrence of this finding, despite achieving acceptable angiographic results. Methods: A total of 229 bifurcation lesions were included ...

We have successfully done off pump total arterial coronary surgery (CABG) using Bivalirudin in a patient awaiting liver transplantation with history of variceal bleed and thrombocytopenia and also in another patient we used Bivalirudin for traumatic mitral regurgitation and heparin induced thrombocytopenia , who underwent mitral valve repair successfully. ...
