[Membrane and Secretory Protein Extraction of Mycobacterium Tuberculosis and Mycobacterium Bovis Using One Dimensional Electrophoresis \(SDS-PAGE\)](#)

Published On: June 30, 2017 | Pages: 040 - 044

Author(s): M K Sharifi Yazdi, Mohammad Khalifeh-Gholi, H Choobineh, A Hadizadeh Tasbiti*, S Sharifi Yazdi and Sh Yari

Background & Aim: Despite the drug resistance M.bovis and Mycobacterium tuberculosis (MTB) are still regarded as two of the global health problems in the world. In the present study, a comparison was made between protein profiles of M.bovis and MTB in order to achieve effective biomarkers for diagnosis of TB. ...

[Relationship between IL28b Gene Polymorphisms and the Risk of Hepatocellular Carcinoma Development within Vietnamese Hepatitis B Virus Carriers](#)

Published On: June 22, 2017 | Pages: 035 - 039

Author(s): Ngo Tat Trung, Dao Phuong Giang, Dao Thanh Quyen, Mai Thanh Binh, Mai Hong Bang, Nguyen Linh Toan, Phan Quoc Hoan and Le Huu Song*

IL28B's SNPs are considered the most important host factors predicting the success of Peg-IFN alpha/ribavirin based regimens against Hepatitis C virus (HCV) infection. ...

[Evaluation of Preliminary Phytochemical Constituents and Antibacterial Activity of Edible Plants against Urinary Tract Infection Causing Bacteria in Children](#)

Published On: April 22, 2017 | Pages: 024 - 030

Author(s): Arun Thangavel*, Omprakash Sahu, Saravanan Ponnappan, Abenezer Tadele, Gezahegn Abawa and Karthikeyan M
The present study is aimed to determine the preliminary phytochemical screening and antibacterial activity of acetone extract of the edible plants, *Solanum nigrum* (L.), *Murraya koenigii* (L.), *Sesbania grandiflora* (L.) against urinary tract infection causing bacteria in children. ...

[Antimicrobial Resistance in Escherichia coli Isolates from Healthy Poultry, Bovine and Ovine in Tunisia: A Real Animal and Human Health Threat](#)

Published On: March 20, 2017 | Pages: 019 - 023

Author(s): Mohamed Salah Abbassi*, Hajer Kilani, Mohamed Zouari, Riadh Mansouri, Oussama El Fekih, Salah Hammami and Nouredine Ben Chehida

A total of 174 *E. coli* isolates collected from healthy poultry, bovine and ovine recovered between December 2009 and June 2013 in different geographic location in Tunisia, were assessed and examined for resistance to antimicrobial agents. ...

[Identification of Bacterial Pathogens in Blood Specimens and Antibiotic Resistance Profiles of Acinetobacter Species in a University Hospital, Konya](#)

Published On: January 19, 2017 | Pages: 004 - 008

Author(s): Selin Ugrakli, Emine Ülkü Okumu and Metin Dogan*

Acinetobacter species are important nosocomial pathogens because they can develop resistance to antibiotics and survive for a long time in the hospital environment. This study aimed to investigate the changes in antibiotic resistance profiles of *Acinetobacter* spp. strains isolated from blood specimens of hospitalized patients in our hospital. ...

[Talins and Cancer](#)

Published On: March 09, 2017 | Pages: 017 - 018

Author(s): Mohamed S Attia Gaballah, Zeinab A Hassan and Mahmoud Youns*

Talin is a large cytoskeletal adaptor protein that is an important component of focal adhesion complexes of adherent cells. It was originally identified as a component of focal adhesions and ruffling membranes of fibroblasts. ...

[Impact of the “Omics Sciences” in Medicine: New Era for Integrative Medicine](#)

Published On: January 25, 2017 | Pages: 009 - 013

Author(s): Noelia Clemente Plaza, Manuel Reig García-Galbis and Rosa María Martínez-Espinosa*

Background and objective: This work collects and analyses information about the evolution of medical practice during the last centuries. The main aim is to summarise new insights on “omics sciences” and their impact in medicine. ...

[Allergenic Ribosomal P Proteins](#)

Published On: January 07, 2017 | Pages: 001 - 003

Author(s): M Serdal Sevinc* and Hari M Vijay

Allergenic ribosomal P proteins have been isolated almost exclusively from allergenic mold species with the exception of one from almond. Presently, nine cloned ribosomal P proteins are listed as allergens in Allergen Nomenclature, WHO/IUIS database. They belong to either P1 or P2 protein families. ...

Case Report

[The First Evidence of Epidemic Strain Clostridium Difficile \(027/NAP1/BI\) in Eastern Croatia](#)

Published On: March 04, 2017 | Pages: 014 - 016

Author(s): Maja Tomi Paradžik*, Dijana Andri, Domagoj Drenjanevi and Jasminka Talapko

case of the first evidence of epidemic strain Clostridium difficile (027/NAP1 (BI) in a patient in Slavonia region (Eastern Croatia) is presented. Clostridium difficile infection presents the leading cause of the antibiotic-associated nosocomial diarrhea and colitis in the industrialized world. PCR-ribotype 027 is a hypervirulent strain with great epidemic potential ...

Mini Review

[An Account of Dengue Epidemics in Central India](#)

Published On: May 09, 2017 | Pages: 031 - 034

Author(s): Priyanka Namdev, Rajesh K Mondal, Rupesh K Srivastava, Vandana Soni and Rajaneesh Anupam*

Dengue virus is one of most rapidly growing arthropod born viral disease in the world which has serious health and economic implications. ...
