## [Breastfeeding and women living with HIV: Is it possible to move beyond the avoidance?](#)

Published On: September 02, 2022 | Pages: 005 - 009

Author(s): Annunziata Carlea\*, Laura Letizia Mazzarelli, Laura Sarno, Caterina Fulgione, Dalila Mantelli and Maurizio Guida

The risk of mother-to-infant transmission of HIV 1 during breastfeeding ranges from 10% to 15% in the absence of maternal Antiretroviral Therapy (ART) and infant Antiretroviral (ARV) prophylaxis. WHO guidelines 2016 recommend women living with HIV and fully supported for ART adherence should breastfeed for at least 12 months and up to 24 months or longer. Anyway, in h ...

## [Progressive multifocal leukoencephalopathy, more than an encephalopathy](#)

Published On: May 24, 2022 | Pages: 001 - 004

Author(s): David Sáez M\*, Nadia Valdés R, Cristian Fernández M and Rocío Pacheco E

Progressive multifocal leukoencephalopathy is a pathology associated with the presence of the JC virus, although it occurs in other conditions, nowadays most cases occur in patients with AIDS, in severe stages of immunosuppression. This condition, and hence its name, has always been associated with the presence of intracerebral lesions, where it can have a wide distri ...
