The underestimated and under rated role of Physiotherapists during COVID-19 in Pakistan

Published On: November 21, 2020 | Pages: 068 - 069

Author(s): Hafsa Imtiaz Khokar*

Physiotherapists are healthcare professionals having direct contact with patients suffering from chronic disorders including COVID-19 [1]. Physiotherapists are also among the practitioners taking responsibility for the wellbeing of the COVID-19 and other infectious diseases management and outcomes thus sharing handsome amount of workload with healthcare systems [2]. ...

Diagnosing low back pain in an evidence-based way: How accurate are we?

Published On: October 22, 2020 | Pages: 060 - 061

Author(s): Rilind Shala*
Back pain is the leading cause of disability globally with 818,000 disability-adjusted life years estimated to be lost annually due to work-related Low Back Pain (LBP) [1].

**Effect of proprioceptive training in male soccer players**

Published On: July 15, 2020 | Pages: 043 - 044

Author(s): Francisco Tomás González-Fernández* and Andres Marmol Perez

Soccer is one of the most popular and practiced sports. Although, we can establish its dynamic character as a determining factor that injuries may occur. Although, the majority of injuries are caused by contacts or impacts, a wide part of them are caused by receptions after jumping and changes of direction of this sport. Here, we show the importance of a proprioceptive...

**Why - Living in a War Zone?**

Published On: September 10, 2020 | Pages: 056 - 059

Author(s): Nancy Bauser*

After a trauma, an illness, a disability, or an addiction, life becomes an uphill battle in all situations. Whether it is dealing with doctors, drug companies, mental health or rehabilitation professionals, living as an independent, self-sufficient human being is simply no longer possible. There are countless adjustments, accommodations and modifications that must be m...

**A new paradigm is needed to guide the utility of functional electrical stimulation**
in rehabilitation medicine

Published On: August 29, 2020 | Pages: 045 - 048

Author(s): Gad Alon*

Back in 2006, an invited commentary raised the question “are we asking clinically relevant questions”? The commentary referenced an application of electrical stimulation in a clinical trial [1]. This question regarding Neuromuscular Electrical Stimulation (NMES) and Functional Electrical Stimulation (FES) is as relevant in 2020. Based on the premise and presumption th ...
